Continuously advancing the care we provide to patients is the hallmark of Hartford Hospital. It is what motivates and inspires us, and it is what distinguishes us as we pursue our mission of excellence in healthcare delivery, education and research, with a clear focus on our patients.

I am proud to work with an incredibly talented staff of professionals who bring vitality and vision to our mission as an academic health center, enabling us to bring advanced care to our communities, and to the people we serve. Our transformative work continues to create an exceptional customer experience as we elevate our quality and safety platforms.

For the work we have done, we have achieved recognition locally and nationally. U.S. News & World Report recently ranked Hartford Hospital Number One in the Hartford metro area and high performing in psychiatry, nephrology, urology and orthopedics. As the major academic medical center and tertiary-care facility within Hartford HealthCare, we continue to play a pivotal role in creating a seamless system of integrated care for the people we serve. We have introduced many “firsts” this year in cardiology, orthopedics, bariatrics, cancer care and other areas of critical need. We are revolutionizing care, and building state-of-the-art environments in which to deliver it, such as our Bone and Joint Institute, now under construction.

We are transforming the care we provide today and preparing for the future, with an unwavering commitment to our patients and community. This commitment colors all we do. With change and challenge come opportunity, and Hartford Hospital and Hartford HealthCare remain strongly positioned to succeed far into the future.

Our success would not be possible without all of you who bring your support, care, commitment and dedication to our hospital. My heartfelt thanks for all you have done, and will do in the future, as we continue to advance forward.

Stuart K. Markowitz, MD
President, Hartford Hospital & Hartford HealthCare’s Hartford Region
Senior Vice President, Hartford HealthCare
Hartford Hospital tops in region.

Hartford Hospital has been ranked #1 in the Hartford metro area and among the best in Connecticut for 2015-2016 by U.S. News & World Report. The annual U.S. News Best Hospitals rankings, now in their 26th year, recognize hospitals that excel in treating the most challenging patients. This year, Hartford Hospital was ranked as high performing in four specialties: nephrology, orthopedics, psychiatry and urology.

Patient Care Services
Prescription for convenience.

We’ve opened the Hartford HealthCare Community Pharmacy in the Medical Office Building at 85 Seymour Street to make it convenient for patients – as well as employees and the public – to fill their prescriptions while on campus. In addition to convenience, making it easy to obtain prescription medications may help increase medication compliance.

Advancing care. In the air.

The need for blood during an emergency can mean the difference between life and death. And now, patients transported on LIFE STAR can get the lifesaving transfusions they need on their way to the hospital. This critical new service was launched during a year in which LIFE STAR marked its 30th anniversary with a variety of celebrations, including a special exhibit at the New England Air Museum.

Where our heart is.

Home buying is part of the American dream. This year, Hartford Hospital helped 12 employees achieve their dreams of ownership through a $120,000 investment in our Housing Incentive Program.
Leading the way in saving lives.

In an attempt to improve survival, Hartford Hospital is training first responders on lifesaving trauma techniques to help victims of mass casualties and active shooters. The program is known as the SWAT Challenge. Physicians and trainers from Hartford Hospital’s Center for Education, Simulation and Innovation train law enforcement personnel on the best ways to offer lifesaving medical support and care for the critically injured, including how to apply tourniquets and minimize blood loss, assess patients, and transport them. In addition, the city of Hartford will become first in the country to widely deploy Bleeding Control Bags developed by Hartford Hospital as a frontline defense against mass-casualty events, including mass shootings and explosions. Similar to automated external defibrillators widely available in public spaces across the country, the Stop the Bleed kits provide tourniquets, hemostatic gauze and other equipment, along with instructions on providing immediate care to victims who are awaiting the arrival of emergency medical response teams. Dr. Lenworth Jacobs, Hartford Hospital vice president of Academic Affairs, presented the most-recent work of the Hartford Consensus at the White House. The Consensus, a group of national professionals, created a national policy to enhance survivability from intentional mass casualty and active-shooter events by training first responders and the public, with a focus on controlling bleeding.
Dr. Pearlson honored for schizophrenia research.

Godfrey Pearlson, MD, founding director of the Olin Neuropsychiatry Research Center at Hartford Hospital’s Institute of Living, has received the prestigious 2015 Stanley Dean Award for Research in Schizophrenia from the American College of Psychiatrists. He was honored for his lifetime achievements in schizophrenia research, which were heralded as a “major contribution to the understanding and treatment of schizophrenic disorders.”

Kidney chain.

Hartford Hospital was one of the participants in the longest kidney transplant chain ever created. Thirty-four desperately needed kidneys were swapped among 26 hospitals, ensuring that the vital organs reached the most appropriate transplant recipients. The lifesaving organ chain, which took three months to fully implement, received national media attention, and was covered by ABC’s “Nightline.”
Making decades of canine comfort.

Our pet therapy program recently celebrated its 20th anniversary. We thank the more than 50 canine volunteers for spreading creature comfort and bringing smiles to countless faces throughout the hospital. We also thank the 1,181 human volunteers who donated 106,000 hours of service to our hospital last year.

Making transitions smoother.

Hartford Hospital is extending care beyond the hospital walls via RightCare, a new software tool that helps reduce hospital readmissions. The tool helps identify patients who would benefit from care after transition from the hospital, and connects the care team with post-acute caregivers before the patient leaves the hospital, to help make care smooth and seamless.
Thumbs up. Phones down.

Saving lives is an integral part of our mission. That’s why Hartford Hospital launched Thumbs Up. Phones Down. The campaign encourages safe driving and discourages texts and other dangerous distractions while behind the wheel. More than 10,000 people have taken the pledge to date.

Continuing advances in cancer care.

The Hartford HealthCare Cancer Institute at Hartford Hospital proudly celebrated the 25th anniversary this year of the Helen & Harry Gray Cancer Center. The Gray's vision and commitment to provide advanced compassionate care to patients in our community has helped countless people. Through Hartford HealthCare Cancer Institute’s membership in the Memorial Sloan Kettering Cancer Alliance, the Gray Center offers access to leading cancer research programs. The Center is the region's largest and most comprehensive cancer center, with over 150 cancer specialists, nurses, and patient navigators and has nine disease management teams to help ensure optimal patient care. A leader in reaching underserved populations with free breast, cervical, colorectal, lung and prostate cancer screening, with the only mobile mammography van in Northern Connecticut, the Center maintains one of the oldest cancer registries in the U.S. and was the first cancer center in the Northeast selected as an NCI Community Cancer Center.
Connecting to a healthier tomorrow.
Under construction at Hartford Hospital.

CESI: A world-wide training reputation.
And destination.

Few places are more advanced than our Center for Education, Simulation and Innovation, a nationally recognized, state-of-the-art medical training and innovation center. Work to expand the center, nearly tripling its size, is now underway, thanks to a state grant. CESI was also recognized this year by the U.S. Centers for Disease Control and Prevention for setting a national standard in training staff in use of personal protective equipment for treating Ebola patients, and was asked to lead a national web conference on Ebola preparedness. Other notable activities at CESI include a visit and tour from Brazilian dignitaries, and training of paramedics from Magen David Adom, Israel’s national emergency medical service, with assistance from LIFE STAR.
Building the future of orthopedics.

Hartford Hospital broke ground this year for a new Bone & Joint Institute designed to be the region’s premier musculoskeletal clinical and research center. The $150 million facility will be five stories tall with 130,000 square feet, including 10 operating rooms, 48-52 inpatient beds (with the capability to expand) diagnostic services, and orthopedic urgent care. The ambulatory and medical space will house three floors with offices for orthopedics, rheumatology and neurosciences, and three ambulatory surgery rooms. Demand for orthopedic services continues to grow, as baby boomers begin to age, and people want to maintain an active, pain-free lifestyle.
Tallwood Urology and Kidney Institute expands reach.

The Tallwood Urology and Kidney Institute at Hartford Hospital is now a system-wide resource that will provide expertise from throughout Hartford HealthCare for patients with urologic and kidney diseases. The Institute has a focus on urologic cancers, kidney stones, pelvic health, men’s sexual function, general urology and chronic kidney disease, and provides education and other resources to help patients better manage their disease. More than 200 prostate MRI-fusion biopsies were performed in 2015; this state-of-the-art technology merges MRI and ultrasound images to provide a more targeted biopsy for more accurate diagnosis and management of prostate cancer.

Our vision for a bricks & mortar community commitment.

It’s part of our vision to enhance our services to some of the most needy in our community through continued construction of a new Brownstone Clinic on Retreat Avenue. We hope that we are able to bring this vision to life with the help of generous philanthropy and support from public funding sources.
Research brings results.

Clinical research studies are a scientific way to determine the viability of new treatment options for patients. Hartford Hospital has more than 1,000 patients enrolled in clinical research studies that include surgery, stroke, cardiology, oncology, psychiatry and behavioral health, women’s health, urology, orthopedics, infectious diseases and more. It’s another way we are advancing care for patients in our communities and beyond.
A heartbeat ahead.

Advanced cardiac care is a hallmark of Hartford Hospital, and last year we had many “firsts”. We performed our first epicardial ablation procedure to treat complex arrhythmia. We were first in Connecticut to implant the new FDA approved Attain® Performa™ quadriporal left ventricular pacing lead and the Viva Quad XT cardiac resynchronization cardioverter defibrillator to keep hearts beating right. We were first in the Northeast to implant a new device which enables people with pacemakers to undergo an MRI, and first in New England to provide access to a new drug representing a new therapeutic target for cholesterol and lipid management through a cardiology clinical research trial evaluating PCSK9 inhibitors. And we opened a Heart Failure Bridge Clinic to help congestive heart failure patients manage their care effectively, while minimizing hospital admissions. In addition to these firsts, we’ve celebrated some major cardiac milestones. Our structural heart program completed its 200th transcatheter aortic valve replacement (TAVR), while our heart transplant program marked its 30th anniversary. The hospital has also been chosen as a research site for a new cardiac clip to determine its effectiveness in treating moderate-to-severe or severe functional mitral regurgitation in patients who are not strong candidates for surgery.

Leading the way in weight loss procedures.

Hartford Hospital is one of the first in the country to offer a new weight loss procedure called Orbera™, in which a balloon is inserted into the stomach to create a feeling of fullness. We’re also now offering vBloc®, an implantable device which reduces hunger by blocking nerve signals that stimulate the appetite.
Making pain go away with MAKOplasty.

Hartford Hospital recently became the first in the region to use a new technology for orthopedic surgery – MAKOplasty for partial knee resurfacing and total hip replacement. The minimally invasive procedure enables precise alignment and placement of implants through robotic-assisted surgery and can result in a quicker recovery time for patients.
Because good health is primary.

Making sure patients of all ages have access to psychiatric services is one of the goals of the new ACCESS-Mental Health Connecticut program, involving the Institute of Living at Hartford Hospital. The initiative connects pediatricians and primary care providers with psychiatry services; the Institute of Living is one of only three such hubs in the state.

Safety first.

Safety is a core value at Hartford Hospital. That’s why visitors are now being asked to sign in, and are given a badge, when they visit Hartford Hospital. You may also see more Public Safety officers in our lobbies and throughout our facilities.
A night of Black & Red. And Blues.

The 24th annual Black & Red gala was a resounding success, netting more than $1 million to benefit the Trauma Center at Hartford Hospital. The Blues Brothers, starring Dan Aykroyd and Jim Belushi, entertained a sold-out crowd of 1,175 friends and supporters at the Bushnell Center for the Performing Arts in January. Proceeds from the hospital’s signature fundraising event are supporting LIFE STAR, injury prevention and outreach, trauma room renovations, equipment, and trauma education.
Charitable gifts make us healthier.

As a nonprofit organization, Hartford Hospital relies on charitable gifts to help support its mission of providing innovative, lifesaving services to everyone in need; improving the health of the most vulnerable in the community; teaching the next generations of medical professionals; and conducting critical research. While it was a challenging year, the hospital took steps to further strengthen its resources in a changing and unpredictable healthcare environment, and philanthropic dollars enhanced extraordinary programs and projects. With corporate leader George Estes as chair, the campaign to expand and modernize Hartford Hospital facilities and resources had received more than $44 million in commitments as of September 30, 2015. Construction of the capstone of the campaign, the Hartford HealthCare Bone & Joint Institute at Hartford Hospital, began in October 2014. Designed to be the premier musculoskeletal clinical center in the region, the Bone & Joint Institute will transform musculoskeletal care while increasing the hospital’s value to a larger population of patients. The Institute’s inpatient building and ambulatory care center are expected to be completed in the fall of 2016. Also among the campaign’s priorities are relocation of the Brownstone Clinic and expansion of the Center for Education, Innovation and Simulation.

Enhancing our environment of care.

As patient needs evolve, so must the infrastructure at Hartford Hospital. Because we are caring for more critically ill patients than ever, we have added 14 beds to our Center 8 Intensive Care Unit. Rooms were designed to enable family members to comfortably spend time with loved ones. We also have been updating rooms on our maternity unit. In addition to new floors and wall covering, we are including special sink tops for bathing our newest arrivals, and have been adding sleep chairs and gliders for families. In addition, we are piloting some new, interactive TVs on the unit. All of these updates and renovations were made possible with the help of generous gifts from donors.
Neuroscience Center.

Hartford Hospital has established a Neuroscience Center to provide comprehensive and coordinated treatment of the central nervous system. The Center includes experts in neurology, neurosurgery, physical medicine, neuropsychology, rehabilitation and more. The Center is made up of numerous programs and centers that focus on research, diagnosis and treatment of a full range of neurological and neurosurgical conditions, including general neurology, neurosurgery, neuromuscular, stroke, neuro-oncology, hearing and balance, and epilepsy.

Together, they provide the most advanced care for patients. Recent innovations are expanding the Neuroscience Center’s range of expertise in anticipation of creating a system-wide institute to increase access to care. These include a Headache Center, a Movement Disorders Center and an Epilepsy Surgery Program.
Laura Saunders, PsyD, ABPP, is a licensed psychologist and clinical coordinator of a new LGBTQ (Lesbian, Gay, Bisexual, Transgendered, and Questioning/Queer) specialty track in Young Adult Services at the Institute of Living (IOL). She has been an Hartford HealthCare employee for 25 years. She has expertise in child psychopathology, behavior management, child development, mood disorders and family therapy. Dr. Saunders has been instrumental in creating a unique service called “The Right Track,” a day program for LGBTQ youth who are struggling with mental health problems. It is one of only two programs of its kind in the United States. Previously, Dr. Saunders was a psychologist on the child and adolescent inpatient units at the IOL, where she supervised psychology interns and fellows in addition to her clinical work.

Mary-Kate Eanniello, MSN, RN, OCN, is a nurse educator in the cancer program. She has been a nurse at Hartford Hospital for 30 years, formerly working as a staff nurse, assistant head nurse and radiation oncology nurse. Eanniello is co-chair of the Clinical Nursing Practice Council and the Hartford HealthCare Nursing Practice Council. Her clinical interests include geriatric oncology, delirium prevention, palliative medicine and nursing education. As a leader in the hospital's Pain Committee, she has been instrumental in improving the safety and quality of nursing pain documentation/protocols. She also has been dedicated to promoting a culture of reducing physical restraints.
The Sixth Annual Hartford Hospital Teams of the Year Competition celebrated the many innovative and strategic successes of teams across Hartford Hospital.

**Brownstone Specialty Clinic and GI Endoscopy Team | Hartford Hospital’s 2014 Clinical Team of the Year**

The 2014 Clinical Team of the Year was the Brownstone Specialty Clinic and GI Endoscopy Team, which increased access to care by reducing the waiting time for colonoscopies from more than a year to less than a month and increasing colonoscopies performed by 48 percent.

**Research Administration Team | Hartford Hospital’s 2014 Clinical Support Team of the Year**

The Clinical Support Team of the Year was the Research Administration Team, which implemented a system-wide Institutional Review Board and a web-based application that enabled 24/7 access to Hartford HealthCare’s entire inventory of clinical research. Their work has been recognized as a national standard of excellence.

Medical staff

Our medical staff includes some of the nation’s most-respected physicians and advanced practitioners. They are talented, compassionate and committed to providing patients with the best possible care.

A complete list of our medical staff can be viewed on our Hartford Hospital web site: www.harthosp.org/findaphysician
Each year, Hartford Hospital contributes to the community in the form of support for other non-profit organizations. The hospital makes donations, forms partnerships, offers financial support or supplies in-kind services to a large number of agencies. In addition, Hartford Hospital staff serve the community by working with local agencies and taking part in the events sponsored by these organizations. The following is a list of those agencies that have benefited from the hospital and, in turn, brought benefit to the hospital.
