

Mom, are you feeling **blue?**

POSTPARTUM DEPRESSION STUDY

We are conducting a clinical study investigating a non-drug therapy that may help with postpartum depression for:

- Women 18 to 50 years old
- With the onset of depression within 6 months of childbirth
- And diagnosis of Major Depressive Disorder (MDD)

Study participants will receive:

- No-cost treatment of an FDA cleared non-drug treatment for depression

If you are interested in this postpartum non-drug depression study, please contact
