RADIATION ONCOLOGY DEPARTMENT

CONSENT FOR RADIATION THERAPY TO THE ABDOMINAL AREA/LOWER BACK

PATIENT NAME: _____
(Print name)

MR#: _____

Proposed Radiation Oncology Treatment site: _____

The undersigned patient acknowledges that he/she has been given sufficient information to make an informed decision about consenting to the Radiation Treatment and simulation/planning activities associated with treatment. Specifically, the undersigned has been told about the potential benefits, risks and alternatives to the Radiation Treatment and consequences to him/her if no Radiation Treatment is given.

I understand that the Radiation Treatment will be delivered to the above site, and I further understand that my physician will continue such Radiation Treatment as long as he/she believes it to be medically indicated. The potential benefit from this Radiation Treatment is that it may significantly lower the risk of recurrence of the tumor in the treatment region and/or alleviate the troubling symptoms as discussed.

I acknowledge that I have been told and understand that the Radiation Treatment may cause any number of the serious side effects listed on the back of this form. While the likelihood of their occurrence is not high, we will take necessary precautions to prevent or minimize their occurrence. I understand, however, that despite any and all of the precautions taken, it is still possible that these and other unexpected complications may still occur.

In connection with the Radiation Treatment, I authorize the marking of my skin with tiny permanent marks to aid in localizing the area of my body to be treated.

Having read this form and talked with my physicians, I understand the potential benefits and risks of the Radiation Treatment. I also understand that reasonable types of alternative treatment might include chemotherapy, surgery or no treatment. No guarantees or promises have been made to me regarding the outcome of the Radiation Treatment.

I also authorize the Hospital and the above-named physician(s) to photograph, video and/or use any other mediums which result in the permanent documentation of my image for medical, scientific or educational purposes, provided my identity is not revealed by them. I agree that any photographs taken pursuant to this authorization, which are not required by law to be retained, may be disposed of by the Hospital so long as the manner of disposition shall be permanent destruction.

I consent to have the radiation simulation/planning and treatments described above administered under the direction of my primary radiation oncologist, who may be assisted by other Hospital affiliated physicians, nursing, and technical staff.

FOR FEMALES ONLY: _____(initials)

I am not pregnant now and have no reason to suspect that I am pregnant.

I understand there is a potential risk to the fetus if I become pregnant during treatment.

This consent may be revocable by me at any time, except to the extent it has already been relied upon.

Patient's initials: _____

POSSIBLE SIDE EFFECTS OF RADIATION THERAPY TREATMENT TO THE ABDOMINAL AREA/LOWER BACK

I understand that any treatment may include side effects as well as the risk of more serious complications. It has been explained to me that each patient reacts differently to the treatment and that I may experience none, some, or all of these reactions to a varying degree of intensity. I further understand that if other types of treatment are given in conjunction with radiation therapy, some of the reactions may be greater or more frequent than if radiation therapy alone is given.

Reactions may include, but not necessarily limited to the following:

Reactions during Radiation Therapy

Common:

- Tiredness
- Mild to moderate nausea and vomiting
- Cramping and diarrhea
- Decreased blood cell count
- Moderate weight loss

Uncommon: occurring in 1-5% of people treated

- Severe nausea & vomiting
- Skin reddening and irritation in the treated area
- Liver damage

Long Term Reactions

Common:

Uncommon: occurring in 1-5% of people treated

- Chronic diarrhea
- Difficulty digesting certain foods
- Adhesions causing bowel obstruction requiring non surgical or surgical treatment

Rare: occurring in less than 1% of people treated

- Stomach or bowel complications causing significant bleeding and/or requiring surgical procedure
- Severe liver damage that could be life threatening
- Severe kidney damage (could cause high blood pressure or kidney failure requiring dialysis)
- Spinal cord/nerve injury
- Cancer in the treated area caused by radiation
- Painful ulceration and infection in treated area

The possible reactions to, and side effects of, the treatment have been explained to me. My questions have been answered.
